

"The Canadian Circumpolar Institute Community in the University of Alberta's Institutional Repository" by Elaine Maloney, University of Alberta

We are all Antarctica. Everything that is happening there is happening on a microcosm within ourselves, our communities, nations and the planet. My father George W. Gibbs, Jr.'s journey with Admiral Byrd's III expedition to the South Pole is an entry point for understanding the keys to positive contribution to the human race and our planet. See my blog <http://j.mp/icetrip>.
